18th September 2023

To Whom It May Concern,

Following the introduction of the Water Fittings Regulations in 1999, Water Companies are required to carry out inspections of the plumbing arrangements within specific types of properties.

The inspections are primarily to ensure that substances contained within the property cannot contaminate the water supply and cause a risk to public health. In addition, the Regulations cover the prevention of waste, misuse, undue consumption, and erroneous measurement of the water supply.

In line with the Regulations, we need to carry out an inspection at the above property. The inspection will be carried out as quickly as possible to minimise any interference with your activities and will not require disconnecting the water supply to your property. It would be appreciated if you could allow access, where practical, to the plumbing arrangements, and inform staff of the date of the inspection.

We have arranged for our Regulations Specialist to attend the above address on **30th October at 10.00am**

In the meantime, I would be grateful if you could confirm receipt of this letter to the email address provided below. If you have any queries, please do not hesitate to get in touch.

We would like to thank you in anticipation of your co-operation in this matter.

Yours sincerely,

Laura Knowles
Regulations Enforcement Officer
laura.knowles@seswater.co.uk
