To Whom It May Concern,

Further to our recent inspection of the remedial work carried out to the water service at the above premises, we are pleased to confirm that the water service, as inspected, now complies with the Regulations.

In order to continue to comply with the regulations you are required to notify us prior to any planned water service modifications, unless carried out by a plumber approved under the Water Industry Approved Plumbers Scheme. A notification form is available on our website at www.waterplc.com/pages/business/services-for-developers/water-fittings-regulations/.

Thank you for the assistance offered to our inspector during his visits.

Yours sincerely,

Laura Knowles
Regulations Enforcement Officer
